

THE SILENTIA SCREEN SYSTEM

# Endless possibilities with Semifix

**EasyClick™** **EasyClean™**

# Build for large spaces with Semifix

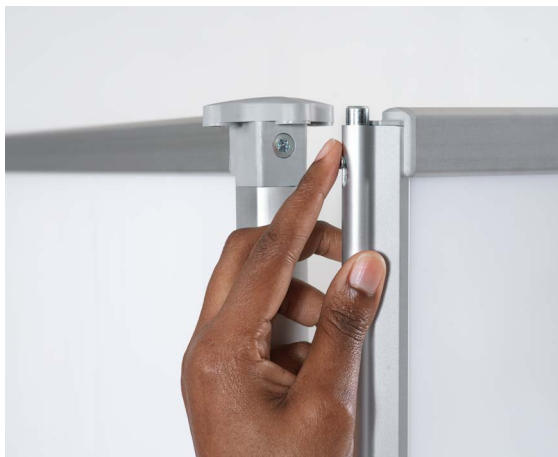

The semifix screen provides endless flexibility to create privacy and optimal hygiene in defined spaces. It is wall-mounted with a stable wheel-base that can rotate 90°. The three-way connector allows the semifix screen to build in four different directions.

With no need for floor attachment, semifix screens create great flexibility for wide spaces between standing room walls. The screens can build out to long, stable walls. You can also combine them with our folding screens.

## Privacy and optimal hygiene

A privacy screen solution that solves problems with wide open spaces. The semifix screen easily combines with a folding screen. All parts are easy to clean directly on site. The smooth, hard surfaces are quickly and efficiently wiped clean. Wheels are easily attached and detached for cleaning.

## EasyClick™ for quick assembly

EasyClick makes it quick and easy to assemble and combine semifix screens. Attach the screen mount to a wall. Connect up to three additional panels to build in four different directions with the EasyClick three-point connector.

Semifix screens can fold in and out

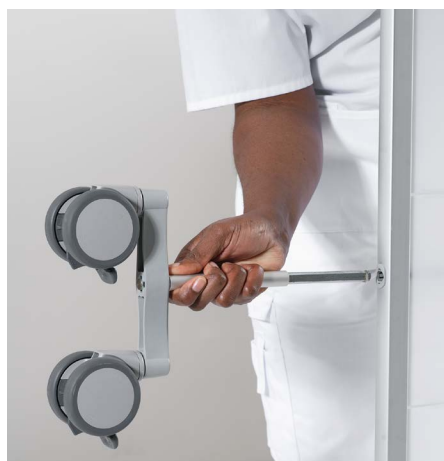

## Easy access for safe care

The wheelbase can be rotated 90° for increased stability or extra floor space. The wheels automatically lock in two different positions, across or parallel with the screen. The wheel suspension compensates for uneven floors.

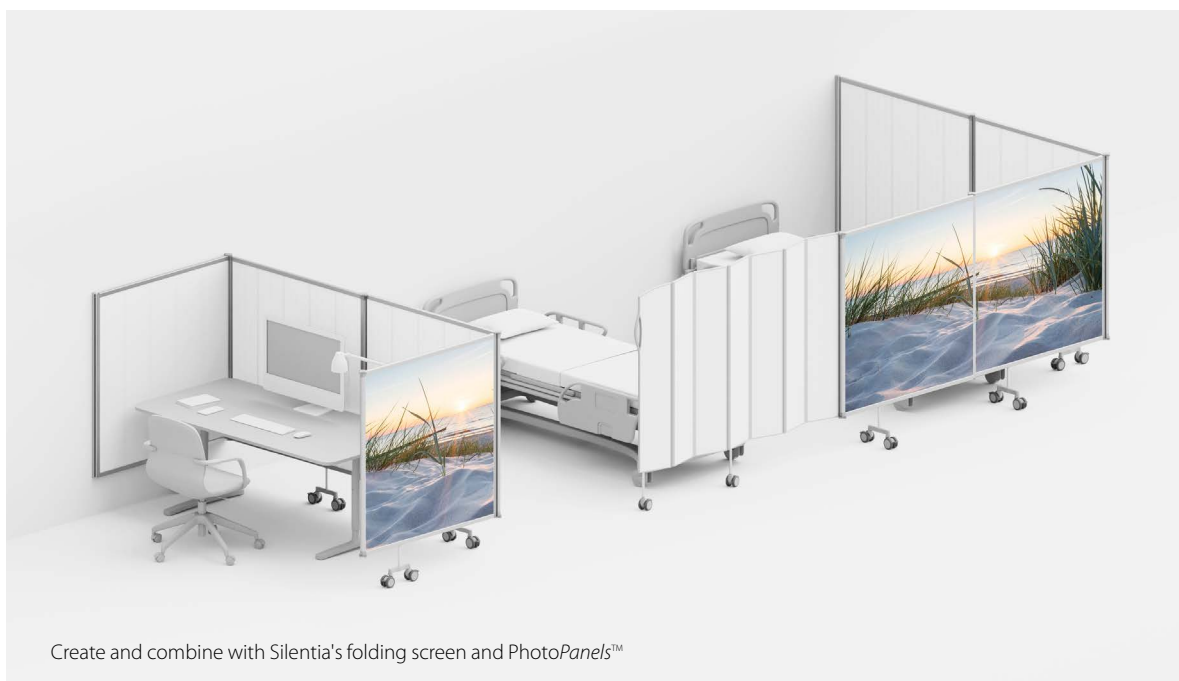

Create and combine with Silentia's folding screen and Colors

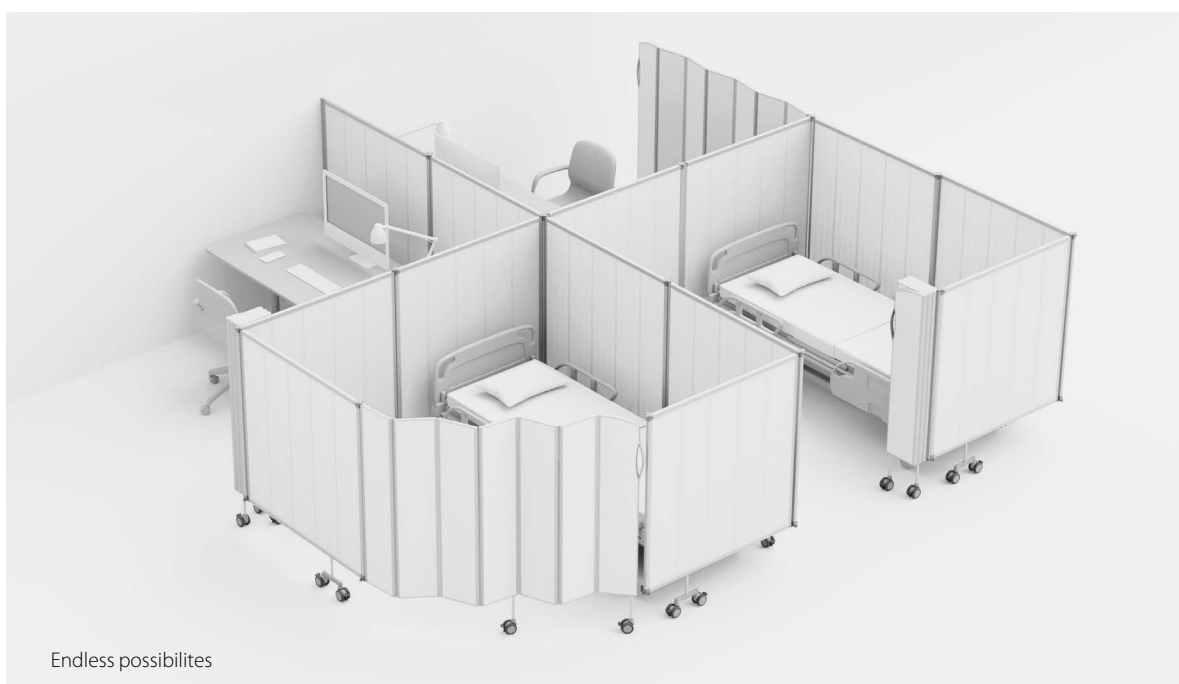

### Flexible solutions

Semifix screens are available in all Silentia design solutions. Let the light in with Day-light screens, add some color or choose a customized design. Choose between three different heights and lengths for your screens. Create your custom medical privacy screen with semifix screens.

Create and combine with Silentia's folding screen and PhotoPanels™

Endless possibilities

**Combine with a Silentia folding screen**

Semifix screens are easily combined with our folding screens for enhanced privacy. The folding screens are easy to maneuver and add even more flexibility to semifix screen solutions.

**Easy to install**

Semifix screens are quick and easy to install. Start by attaching the screen mount to a wall. Continue to build out the screen with the three-point EasyClick connector. Our EasyClick function allows you to attach and combine screens with a simple click, making it easy to move and reconfigure screens.

HEIGHT	ART. NO. LENGTH ≈ 0.75 M	ART. NO. LENGTH ≈ 1.0 M	ART. NO. LENGTH ≈ 1.2 M
1.45 m	06143	06144	06145
1.65 m	06243	06244	06245
1.85 m	06343	06344	06345
